#### **DETAILED ACTION**

#### Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Matsui (US 6441924).

#### Referring to claim 1:

Matsui discloses an apparatus for sending and receiving digital image data from a computer network, wherein said digital image data carries an electronic destination address and is transported over said computer network in accordance with standard network transmission protocols, said apparatus comprising:

network interface means 24 for coupling said apparatus to said computer network;

apparatus address means C24 for storing a unique electronic apparatus address for said apparatus;

signal recognition means 6 (col. 3, lines 21-24) for determining receive status information:

address receiver means 6 (col. 3, lines 24-26) coupled to said network interface means for receiving said electronic destination address;

address comparison means 8 (col. 3, lines 29-36) coupled to said apparatus address means and to said address receiver means for comparing said electronic destination address to said unique apparatus address and providing a match signal when said two addresses are the same;

digital image data receiver means 33 coupled to said network interface means, said address comparison means and to said signal recognition means for receiving said digital image data when said match signal is provided.

In Matsui, note also discussion of Fig. 9 starting at col. 9, line 38.

#### Claim Rejections - 35 USC § 103

Claims 2-7, 20, and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matsui as applied to claim 1 above, and further in view of well known prior art.

Referring to claims 2-7, the various recited encryption means are well known in the prior art and it would have been obvious to one of ordinary skill in the art to have included in Matsui such encryption means in order to provide security over the computer network.

Referring to claims 20 and 22, unique address or identification information embedded in the hardware of an apparatus or obtained from biometric input connected to the hardware of the apparatus is well known in the prior art and would have been

Art Unit: 2625

obvious to one of ordinary skill in the art to have used Matsui in order to identify specific apparatus or persons associated with the apparatus and thereby increase communication security.

## Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 2-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Referring to claims 2-7, there is not antecedent basis for "said conversion means" or "said electronic mail agent".

Referring to claims 8-9, there is not antecedent basis for "said electronic mail agent" or "said mail server".

Referring to claim 10, there is not antecedent basis for "said output means" or "said mail server".

Referring to claims 11-14, there is not antecedent basis for "said electronic management means".

Referring to claims 15-19, there is not antecedent basis for "said conversion means".

Art Unit: 2625

## Allowable Subject Matter

Claims 21 and 23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### Cited Art

The art made of record and not relied upon is considered pertinent to applicant's disclosure. Hasegawa discloses a facsimile device managing messages including an identifier matched to a pre-stored identifier (note for example col. 2, lines 14-36).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott A Rogers whose telephone number is 571-272-7467. The examiner can normally be reached Monday through Friday 8:00am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Moore can be reached at 571-272-7437.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to TC2600 Customer Service at 571-272-2600. Official correspondence by facsimile should be sent to 571-273-8300. The USPTO contact Center phone numbers are 800-PTO-9199.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
